SUPERYUPO⁺ - EXTREMELY DURABLE AND EASY TO PRINT ON

SuperYUPO⁺ is the latest product in the YUPO Corporation's conventional printing line. It is the first YUPO material that can be printed on both sides with paper inks. Bid farewell to the hassle of changing inks or reconfiguring the machine for synthetic materials. This outstanding print substrate is quick-drying and tear-resistant, with a silky smooth surface.

Continuing the commitment that Yupo Corporation has with the protection and care for the environment, we are proud to promote that our SuperYUPO⁺ contains up to **40% mineral content**, depending on the thickness of the grade, and being a PP based material.

USES

- Maps
- Manuals
- Brochures
- Posters
- Calendars
- Banners
- Bracelets

CHARACTERISTICS

- Paper inks can be used to print on both sides
- Tear- and water-resistant
- Resistant to mineral oils
- Multitude of additional processing options
- Outstanding printability
- Quick-drying
- Resistant to fading under UV light

PLEASE NOTE

SuperYUPO⁺ is not suitable for UV-off-set printing. For UV-off-set presses, we recommend SuperYUPO FEBG.

VERSION SUPERYUPO ⁺	THICKNESS µm	GRAMMAGE g/m ²	ROLLS mm × m	CORE mm	SHEETS mm × mm	UNIT per ream	PRINT METHODS
